PORTFOLIO SNAPSHOT

Enterprise Storage and Optimization 

Datacentre Infrastructure and Power management 

Mobility Services 
An ISO 9001 Company

Security , Network and Infrastructure 

Software development and outsourcing

Strategic IT management

Annual IT support and Maintenance Services

PRODUCTS PROFILE

Enterprise Storage and Optimization

A leading provider of next generation energy efficient disk-based storage systems designed for the long-term storage of digital information. Our hardware and software systems are ideal for storing and archiving information commonly referred to as "fixed content", since it typically changes little over time.

This includes medical images, email, business documents, video images, research data, and digital media of all types. Our solutions enable organizations to store and access growing amounts of fixed content over longer periods of time, while meeting evolving business and compliance requirements in a "green" environment.

Datacentres Infrastructure and Power management

In today's "always on, always available" world where businesses can't stop and downtime is measured in dollars, American Power Conversion (APC) provides protection against some of the leading causes of downtime, data loss and hardware damage: power problems and temperature. As a global leader in network-critical physical infrastructure (NCPI) solutions, APC sets the standard in its industry for quality, innovation and support. Its comprehensive solutions, which are designed for both home and corporate environments, improve the manageability, availability and performance of sensitive electronic, network, communications and industrial equipment of all sizes.

PRODUCTS PROFILE

Mobility Services (IVMS and VTS)

Our initiative into edge technologies is our commitment to providing better and innovative solutions to clients in the region. This value added support and delivery model is to reach beyond our clients expectations.

As an initiative in this direction we have evolved out the Mobility Solutions which caters to the mobile workforce and assets needs and remote data acquisition needs of the enterprises. This initiative encompasses technologies including RTLS (Real Time Location Sensing), GPRS, GSM to ILS (Indoor Location Services) and RFID

Product development and Outsourcing

Our associate partner IOTAP have an excellent track record for the software development and have experience working in the government as well the private sectors.

IOTAP has core competency in development and maintenance of distributed, enterprise-wide robust applications that are technology and quality driven. A portfolio show-cases extensive work in Internet and Intranet technologies and mission critical web and enterprise n-tier applications. - Maintenance Agreements
- On site Resident Service Engineer
- On-site repairs

We offer our discerning clients the services of our support specialists for extended periods of time. Under this program we are currently providing a dedicated on site engineer with the appropriate skill-set to our customer

PRODUCTS PROFILE

Strategic IT Management

The IT organizations of businesses face steadily increasing demands, not only in times of crisis.

They are requested to contribute measurably and significantly to solutions for corporate challenges, whilst accommodating maximum flexibility and cost efficiency. An optimal combination of lean structures and processes with sustainable technologies and modern control mechanisms is indispensable for this purpose.

We offer you strategic IT management solutions, which conciliate your business information infrastructure with your business objectives.

In partnership with you, our consultants develop innovative concepts for a customer-oriented IT organization:

- ❖ IT Strategy: Strategic alignment of your IT, taking into consideration your commercial goals and following IT service models customary to the market (ITIL, COBIT, CMMI, etc.) by evaluating existing alternatives for the sourcing of IT services (off-/near-/best shoring)
- ❖ IT Optimization: Exposure of weak spots and improvements in organization and processes, in order to reduce complexity and redundancies, on the basis of ITIL by certified advisors
- ❖ IT Control: Analysis of financial, temporal and qualitative performances of IT processes and the generation of transparency for the management, through performance measurement systems and, amongst others, IT scorecards
